QR Code is like sex.

Everyone may look at it...

But not too many know how to get it right.

if we can agree on one thing it's that... today more than ever creativity is the most sought after commodity. Here are a few examples that might help you make use of our services

Recent studies suggest that black and white QR codes are normally ignored by most people as they do not have anything unique and creative about them. The fact they are meaningless makes them unapproachable and undesirable.

Creativity allows you to better represent your brand idea in an attractive way, drawing your customers' attention and thus generating the action you were looking for.

The beauty in QrVision it is that by incorporating a logo or image into your unique code you "own" it, people immediately recognize the code as your own or try to understand what's it about!

What's so great about a QRV code is that you can embed it onto any marketing or promotional item that you hand your clients.

Many businesses owners make use of the idea of placing a QRV on their Email Signature, business card, official papers, letters etc...

QrV is the most technologically advanced custom QR available in the market. The advanced QrV allows the business to have its very own custom designed QR by choosing among style combinations of shapes with virtually unlimited colors.

QrVision is an ingenious combination of design and expertise. We are proud to be the founders of the world's first designed code.

QrVision is the leading brand in its field with 35 partners and distributors across the globe. (As for the time these lines are written...) we are the world's oldest and largest.

Knowledgeable factors claim that... by 2017 video will make 69% of all internet consumer-traffic. By Sysco 1/10 of all the videos are being watched by mobile phones and tablets. We can see a significant increase in the use of videos through mobile phones and the numbers keep on climbing by more than 57%.
